Continuation of Substance of Interview including description of the general nature of what was agreed to if an agreement was reached, or any other comments: The examiner and applicant's representative discussed a proposed amend to claim 16. Applicant proposed amending the providing a power voltage step of claim 16 to include "and a power management signal". The examiner stated that Takashima did not appear to provide a power voltage based on both a determined idle status and a power management signal. However, the examiner stated that a further search would be required in order to determine whether the proposed amendment makes the claim allowable over the prior art.
